● Activated Alumina & Potassium Permanganate

# WiseFresh® Ethylene Absorber

WiseFresh® Ethylene Absorber targets ethylene, a common gas that accelerates the ripening of fruits, vegetables, flowers and other fresh produce. Ethylene is naturally released continuously during the growth and storage of these products, and the accumulated gas will further speed up their maturation, aging and deterioration, which greatly shortens the fresh-keeping time and affects product quality.

Premium activated alumina and potassium permanganate absorb ethylene.

Retards produce ripening while extending shelf life and preserving freshness.

Breathable and waterproof packing material, not easy to break, safely contact food.

Convenient and practical, suitable for refrigerators and product storage areas.

Its main ingredients are **activated alumina** and **potassium permanganate**, which can effectively absorb ethylene released from fruits, vegetables, flowers, and other products, slow down the ripening speed and keep the products fresh for a longer period. **Waterproof** and **breathable** materials are used as packaging materials to allow safe contact with products.

Spec	Product Code	W*L (mm\in)	Packaging Quantity
5g (30cc)	HF3ETH-5-TF1US	45*70/1.77*2.76	1800/5 bags/box
10g (60cc)	HF3ETH-10-TF1US	60*70/2.36*2.76	900/5 bags/box
